

Discotill

Privileging the versatility

**Alliance of classisism
and modernity**

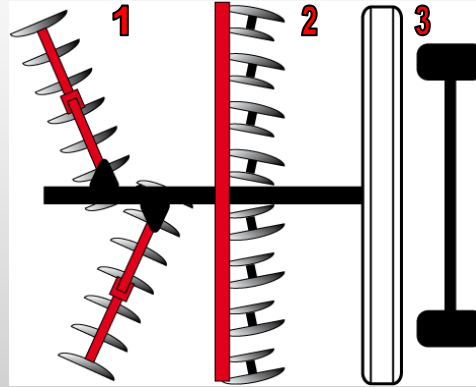

**For tractors from:
95 - 195 HP**

Discotill is a combination between classic disc harrow and independent discs. This association makes it possible to cumulate the advantages of the these two tools, by keeping the penetration capacity of a disc harrow and the finish of the independent discs.

Discotill: Alliance of classicism and modernity

- 1** Overlapped disc gangs at the front
- 2** Independent discs at the rear.
- 3** Roller

An original combination for a better result

The front disc gangs are assembled on a of 40 mm square shaft. It is possible to adjust the working angle with a mechanical turnbuckle or hydraulic rams in option.

Rear disc gangs are assembled by pair fitted on one shaft. Each support is protected by a shock absorber « Roll Choc », which ensure a homogeneous ground-straw mixture and a perfect finish.

The rear roller carries out the control of depth, press the ground and refines stubble-ploughing carried out. A broad choice of rollers is available in option.

Optimum control of the working depth

All Discotill models are equipped with a hydraulic compensating cylinder on drawbar (1), and a rear roller (2) With these two adjustments the Discotill guaranteed the respect of the working depth whatever tractor speed.

A wide choice of rear accessories

Crumbler roller
Ø 500 mm

Twin roller
Ø 500 mm

« U » roller
Ø 500 mm

Triple harrows
Ø 14 or 16mm

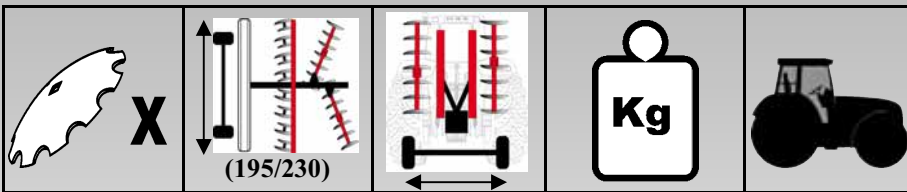

Terrapak

Twin & U roller
Ø 500 mm
